

**METHOD AND SYSTEM FOR AVAILING
PARTICIPANTS IN A SPECIAL NUMBER CALL EVENT
AND OTHERS OF INFORMATION CONTAINED IN A
PLURALITY OF DATA STORES**

ABSTRACT OF THE DISCLOSURE

A method for availing participants and others in a special number call event of information contained in a plurality of data stores includes the steps of: (a) in no particular order: (1) providing the plurality of data stores; (2) providing at least one respective data key for accessing the information contained in each respective data store of the plurality of data stores; and (3) providing communications among the participants and the plurality of data stores; (b) identifying a respective call as initiating a special number call event; (c) generating an identifier code for uniquely identifying the special number call event; the identifier code including relational data; the relational data being mappable on the at least one the respective data key to effect accessing the information; and (d) employing the communications to effect cooperation by the identifier code with each respective data store for providing the information to the participants.
